Enabling Supply Chain Visibility Through Mobile Computing

Helping transportation and logistics companies deliver more to the bottom line
Find your competitive edge

Transportation and logistics companies must constantly find new ways to compete. High fuel prices, government regulations, driver turnover, increased customer demands and tighter margins require improved cost efficiencies. The more you know about your operations in real time the better you can manage and deliver efficiencies.

Maximize your operations

To remain competitive and combat external and internal business pressures it requires an experienced partner with the expertise to help you gain operation visibility. That's Intermec. Our broad lineup of rugged and versatile automated mobile computing solutions enable new levels of supply chain transparency, higher labor productivity and improved customer service.

Increase visibility

Implementing mobility solutions helps companies improve overall operations performance and increases workflow through distribution systems, shipping receiving and yard management. Streamlining the movement of drivers and shipments, allows for greater utilization of assets and resources. The availability of real-time information from the road also improves planning and scheduling of operations on all fronts. Instantly available information means faster invoicing, more accurate route planning, scheduling and dispatching and less time in the cab for drivers.

Rapid ROI

Intermec transportation and logistics solutions are a smart investment with a fast payoff. By increasing productivity, accuracy, and compliance, our systems deliver rapid return on investment often times less than one year after installation.

Clear path to the future

Intermec solutions can grow with you. Our mobility solutions are built on open platforms and standards. They integrate easily with current systems, are interoperable, and provide an easy migration path to the latest technologies.

The time is now. The technologies are here. Only Intermec brings together the rugged mobility solutions, relationships and deep industry experience you need.
Combining a complete range of rugged technologies, a collaborative approach, and strong industry partnerships, Intermec makes implementation of your transportation systems simpler, easier, more complete and effective.

Five ways Intermec helps transportation and logistics companies stay ahead of the curve

Robust, easily integrated product line
From next-generation mobile devices and radio frequency identification (RFID) readers to breakthrough scanning technology, our full range of products are built tough for dependable, reliable service. Our systems are based on industry standards to provide seamless integration and assured compatibility—now and in the years to come.

Powerful partnerships
A successful, trouble-free operation requires the right mix of hardware, software, services and related technologies. That’s why Intermec partners with top-tier industry leaders including Cisco, IBM, Microsoft, Oracle and SAP. By working together, we’re able to provide you with proven, end-to-end solutions.

Global reach
Powered by a global team of experts, Intermec has over 40 years of innovation and experience. We operate in more than 70 countries around the world. Our clients include 75% of Fortune 500 companies. Broad and deep resources enable Intermec to serve you everywhere you do business.

Committed to open standards
Intermec develops products based on open standards, giving you more and better technology choices and providing an easy migration path to new technologies. Our products are certified for Cisco® Compatible Extensions, built on Microsoft’s Windows Mobile and CE platforms, 802.1x security, 802.11a/b/g wireless and EPC Gen2 RFID standards.

Expert service and support
Experienced Intermec professionals and partners work closely with you to choose systems that will have the greatest strategic impact on your business and the quickest ROI. Our Global Services team helps you achieve flawless implementations on or ahead of schedule, as well as provide cost effective long-term preventive maintenance and repair services.
Superior mobility solutions

A wireless infrastructure is fast becoming a required enabler for transportation companies, necessary to gain new visibility into fleet operations and management; yard and asset management; and driver communications. We leverage our strong relationships with partners to help you create a total mobile solution that harmonizes with your networks, platforms and processes. Our collaborative approach can ensure a more complete and seamless implementation whether your need is for RFID or a Cisco WLAN infrastructure.

Full product line

Intermec delivers a full line of products especially well suited for the needs of transportation and logistics companies, including mobile computers, RFID systems, printers, scanners and our SmartSystems™ solution for remote device management. Working in concert with partner solutions in software, middleware and wireless access, Intermec systems deliver the outstanding performance you need to improve operational efficiencies and customer service.

Warehouse and logistics operations

- **Accurate pallet, case and tote tracking with RFID labels/tags**
- **Pick-up and delivery with mobile computers**
- **Automatic RFID tag reading with fixed and forklift-mount readers**
- **Wireless barcode/RFID label printing with printers and media**
- **Accurate inventory scanning with mobile computers and RFID readers**
- **Faster picking with speech recognition**
- **Cross-docking with vehicle-mounted computers and cordless scanners**

Intermec

SmartSystems™

Cisco Partner Technology Developer
Innovation

Intermec is leading innovation with technology advancements such as our breakthrough laser scanning, RFID solutions, time-saving system management software and the broadest range of services delivering industry-beating performance.

Technology convergence

New capabilities in Intermec mobility solutions enable industry leading applications on common platforms to put better tools in the hands of your employees. Our systems deliver on the promise of today’s technology and leverage integrated video, scanning, cameras, VoIP, Cisco CCX compatible WiFi, Bluetooth, 3G WAN radios, speech recognition, mag stripe readers and RFID.

Pick-up & delivery, in-transit visibility, home delivery and field service

Back office solutions from industry leading providers

Proof of delivery and track & trace with mobile computers and printers

Real-time delivery tracking, driver communications and fleet management with WWAN and GPS-enabled mobile computers
Complete line of supply chain products and services

Mobile computing solutions
Mobile and fixed RFID systems
Scanning technology
Printers and media
Professional services
Wireless networks
Support services
Software tools and utilities

Applications

Driver Communications
Fleet Management
Warehouse Operations
Cross Dock Operations
Yard Management
Fleet Maintenance
Time and Attendance
